A Picture Is Worth A Thousand Words....
Our Pictures Become Our Memories……

Each year USMWF reaches out to 1000s of families throughout the United States with our multiple social media sites, correspondents and events offering support and guidance to those that have lost their loved ones due to work related incident.

We are so grateful as many families have shared their memories of their loved ones’ with us by sending a photo of one of their favorite memories. It is a sad reminder that although we often gain an article or hear someone is lost in and incident but we never truly understand the magnitude of the loss until we have a heartfelt contact with the family and receive a photo.

Each photo is a story of a fallen worker’s family, dedication, love, life and memory. A picture that represents a life that has no future but will be remembered forever through USMWF and his or her family. A life that was taken suddenly, but their story will remain to be told making awareness to workplace safety, protecting other workers and their families from enduring the same loss.

These photos truly mean a lot to the USMWF family members and we thank all the families that have shared their loved ones memories with us.

GOING TO WORK SHOULD NOT BE A GRAVE MISTAKE!!!
